

Eliminating Death and Promoting Ascension

XENESIS

[s e n e s i s]

This code is especially crucial. It entirely eliminates the concept and manifestations of death from the Earth and from our lives. Through this the fundamental fear of mankind and all living creations on Earth disappears.

Death is a transitory state. It is no other than monumental negative energy programmed by words and cell memories, which delays the advancement of the soul.

In other spheres of the Universe, people can choose freely accordingly to their inner feelings when they wish to rise up into a higher, more advanced dimension which is a joyful event and they receive loving and happy support from their environments in this endeavour. Shifting dimensions doesn't mean the end of existence, but rather the achievement of a higher, more complete life with permanent safeguarding of consciousness. There is free passage between dimensions.
